

Streaming Video and Multimedia Resources

	<p>Access Video On Demand provides public libraries an expansive, search-friendly collection of thousands of high-quality videos that complement and enhance any library's content holdings. Bring patrons exceptional content from the world's top producers, including PBS, BBC, A&E, HBO®, and National Geographic.</p>
	<p>Just for Kids gives children—and their parents—a kid-safe, ad-free streaming video platform. This collection is ideal for preschoolers and early learners, an after-school or ESL/ELL program, homework help, or resources for homeschoolers that patrons can access in the library or at home.</p>
	<p>The World Cinema Collection connects public libraries with international films from around the world. Celebrate the power of multicultural storytelling with exceptional and entertaining films from Africa, Asia, Europe, Latin America, the Caribbean, and the Middle East.</p>

Research Databases

 African-American History	<p>African-American History is a multimedia database designed to support researchers, providing resources spanning more than 500 years of the rich tapestry of the African-American experience. Expand background knowledge and gain context by delving into biographies of key figures, pivotal events, famous speeches and primary sources, and detailed timelines.</p>
 American History	<p>American History is a comprehensive multimedia research database that spans U.S. history. Supplement social studies resources with articles, biographies, primary and secondary sources, videos, images, timelines, maps, and graphs. Expand background knowledge and drive research with the most comprehensive range of information in one complete resource.</p>
 American Indian History	<p>American Indian History is a multimedia database encompassing more than 600 Native American groups, curated to supplement library collections. Extend your American history resources with the vibrant stories and perspectives of Native American cultures, histories, and contributions. Includes engaging and informative article entries, biographies, primary sources, videos, images, timelines, maps, graphs, and a wealth of additional resources.</p>
 Ancient & Medieval History	<p>Ancient and Medieval History is a curated, comprehensive research database spanning prehistory through the mid-1500s. Supplement history research with articles, biographies, primary sources, maps, and timelines from across ancient civilizations. Topic Centers cover key geographic areas and civilizations, including medieval Africa, Asia, and the Americas; and Ancient Egypt, Greece, and Rome.</p>
 Bloom's Literature	<p>Bloom's Literature is a curated multimedia database of literature reference texts that guides research and puts great literary works into context. Support assigned readings and inspire real-world connections with overviews, literary criticism, background information, author biographies, and audio and video content.</p>

	<p>Credo Reference pairs trusted reference content with research skill-building tools in an easy-to-use database. Gather background knowledge and pull from citable sources with 1,400+ full-text general and subject-specific reference eBooks, including 500,000+ images. Use interactive Mind Maps to explore popular topics, and seamlessly access your other library resources. Credo Reference: Complete Core includes an extensive juvenile nonfiction collection, perfect for providing homework and research support.</p>
<p>Ferguson's Career Guidance Center</p>	<p>Ferguson's Career Guidance Center is a comprehensive multimedia resource of career exploration and workplace skills-focused content to support college readiness and vocational training pathways. Find articles, videos, and more that are curated to popular career paths, encouraging patrons to discover careers where they can best apply their strengths and interests to real-world uses.</p>
	<p>Health Reference Center is a curated research database providing informative content on health and nutrition, social and peer issues, puberty, and mental health topics. Hundreds of articles and videos supplement library health and wellness collections, and provide a safe space for patrons to build practical health knowledge and research personal health questions.</p>
	<p>History Research Center supports research and builds background knowledge by cross-referencing six databases covering American and world history. Read, evaluate, draw parallels, and develop informed opinions with primary sources, essays and critiques, videos, maps, and timelines that cover historical and cultural topics from prehistory through modern times. History Research Center surfaces content from these trusted databases: American History, Ancient and Medieval History, Modern World History, African-American History, American Indian History, and World Religions.</p>
	<p>Issues & Controversies is a database that features unbiased pro/con articles and primary sources to supplement humanities research on topics relevant to today. Each debate topic consists of explanatory introductions and quoted passages that help readers understand an issue, assess different perspectives, and reach independent conclusions.</p>
<p>Issues & Controversies IN HISTORY</p>	<p>Issues & Controversies in History is a thorough multimedia database of compelling debate topics and conflicts in U.S. and world history. Unbiased pro/con articles, primary sources, videos, and targeted discussion questions unlock understanding of issues, conflicts, and interpretations throughout history to help with thinking critically and writing analytically.</p>
	<p>Modern World History is a research database that presents a comprehensive look at world history from the Renaissance to today. Provide extensive background knowledge and context through thousands of subject entries, biographies, images, videos, maps and graphs, primary sources, and timelines. Expand on historical topics and guide research with detailed and comparative views of the people, places, events, and ideas that define our modern world.</p>
	<p>The Mailbox® Plus elevates activities with ready-to-print worksheets, craft ideas, songs, games, graphic organizers, patterns, clip art, cards, and more. Discover printables across subjects and customizable templates to support learning for traditional and homeschooling students and their families.</p>
	<p>Polling the Nations is an online database of public opinion polls curated to supplement and inform research. Connect patrons with the polls and tools to investigate, analyze, and think critically about the important challenges facing the world. Access 30+ years of polling data, more than 750,000 original polling questions, and results from 18,000+ surveys conducted around the world from 1986 to the present.</p>

 Science Online	Science Online is a STEM reference knowledge base on the full range of scientific disciplines, built to enhance understanding across all scientific fields. Support research and fill the gaps of static science books with engaging multimedia content to provide homework help, ignite curiosity, and facilitate understanding of core scientific concepts.
 Today's Science	Today's Science provides accessible articles on the latest scientific breakthroughs and real-world discoveries. Expand on print science collections with this database of easy-to-read, comprehensive texts by leading scientists from peer-reviewed scientific articles and journals.
 THE WORLD ALMANAC KIDS	The World Almanac® for Kids is a multimedia database that erases the line between homework support and fun exploration, with cross-curricular and high-interest topics. Capitalize on curiosity with videos, games, assessments, and handouts that propel self-led study and guide research.
 THE WORLD ALMANAC KIDS Elementary	The World Almanac® for Kids Elementary is a multimedia database that enhances homeschool, traditional, and independent learning. High-interest reading passages are grouped with reinforcing videos, science projects, games, printable activities, and interactive quizzes. Includes cross-curricular and kid-friendly topics, including plants, sports, animals, geography, biographies, math, and much more.
 Facts On File WORLD GEOGRAPHY & CULTURE ONLINE	World Geography and Culture is a trusted research database designed to propel understanding of the world and expand your library's multicultural collections. Draw parallels across time periods and geographical areas with information on individual nations' geography, history, society, and culture, plus maps and flags, videos, images, audio recordings, biographies, and timelines. With dozens of entries for each country, state, and province, World Geography and Culture provides patrons with a safe reference site for background knowledge or in-depth study.
 World News Digest	World News Digest is a vetted, unbiased news archive designed to extend news resources and provide critical context on key issues and events since 1940. Conduct factual research and evaluate partisan spin with exclusive access to more than 350,000 original articles written for easy readability, connecting history with current events.
 World Religions	World Religions is a reference database that provides in-depth content on 15 of the world's major religions and spiritual practices. Supplement history or geography collections and integrate religious movements into historical context with overview articles, videos, sacred texts, primary sources, biographies, and holiday calendars. This database helps researchers to draw parallels, gain background knowledge, and expand their curiosity about the world and human belief systems.
 Facts On File Writer's Reference Center THE FUNDAMENTALS OF QUALITY WRITING	Writer's Reference Center is a reference database that offers your library a centralized hub for writing and research skills, with tools to equip patrons with writing mechanics and grammar, style and research techniques, persuasive and thesis essay organization, test prep, vocabulary, and other essentials for effective writing.
eBook Subscriptions	
 InfobaseBooks	The Public Library eBook Subscription provides access to thousands of eBook titles curated across subjects and high-interest topics—a great companion to your collection, and a resource for homeschoolers and homework help. Build background knowledge, develop sustained reading skills, differentiate reading materials, and spark interest with fiction, nonfiction, and reference titles.

	The Teen Reference eBook Subscription is designed to support teen health and financial literacy. Connect patrons with reliable information, ignite curiosity, and support research with this invaluable collection of reference eBooks that teens can access independently.
	The Health Reference eBook Subscription provides in-depth reference eBooks on essential health topics, including diseases and injuries, men's and women's health, preventive care, medical tests, health technology, and more. An excellent resource for research, this series can also help answer patrons' personal health questions in a format they can access independently.
